Edwards AFB CA93524

Subject: Letter of Appreciation

Tremendous thanks to Cutting Edge for executing an emergency pavement repair on our main runway. I really appreciate your teamwork and willingness to assist us with only one day's notice. This particular repair was approximate three feet square, on the runway centerline. Additionally, compression joint seal was missing from all four adjacent joints. Your team completed a very high quality concrete repair and replaced all surrounding joint seals. I appreciate the high quality of your work, which gives me great confidence in the durability of the repair on a critical portion of Edwards's main runway.

Thanks once again for your support of the Edwards Air Force Base flying mission!

A handwritten signature in blue ink, appearing to read "D. Sampson", with a long horizontal stroke extending to the right.
